

The Cycadales

Genera

- Cycas** - Southeast Asia, Australia. 90 species.
- Stangeria** - South Africa. Monotypic genus (*S. eriopus*).
- Bowenia** - Queensland, Australia. 2 species.
- Dioon** - Central America. 11 species.
- Encephalartos** - Africa. 62 species.
- Macrozamia** - Australia. 38 species.
- Lepidozamia** - Australia. 2 species.
- Ceratozamia** - Central America. 15 species.
- Microcycas** - Cuba. Monotypic genus (*M. calocoma*).
- Zamia** - North, Central, and South America. 50+ species.
- Chigua** - South America. 2 very rare species.

Soil Mixes

Most cycads:

- 1 part pumice (perlite will do, but pumice is superior)
- 1 part 0 grade silica blasting sand*
- 1 part peat moss
- 1 part fir bark
- 1 part dark compost

Xeric cycads:

- 2 parts pumice
- 1 part 0 grade silica blasting sand*
- 1 part fir bark
- 1 part dark compost

*or some mixture of this with granite sand and/or dolomite and a dash of green sand.
